Integrating precise Jurisprudence with high-speed Information
Technology to eliminate operational friction.

| MEASURABLE BUSINESS IMPACT

75%

Legal Admin Savings

35%

DSO Reduction

100%

Compliance Record

Real-world results driven by automated legal notice and tracking systems.

AR COLLECTION AUTOMATION

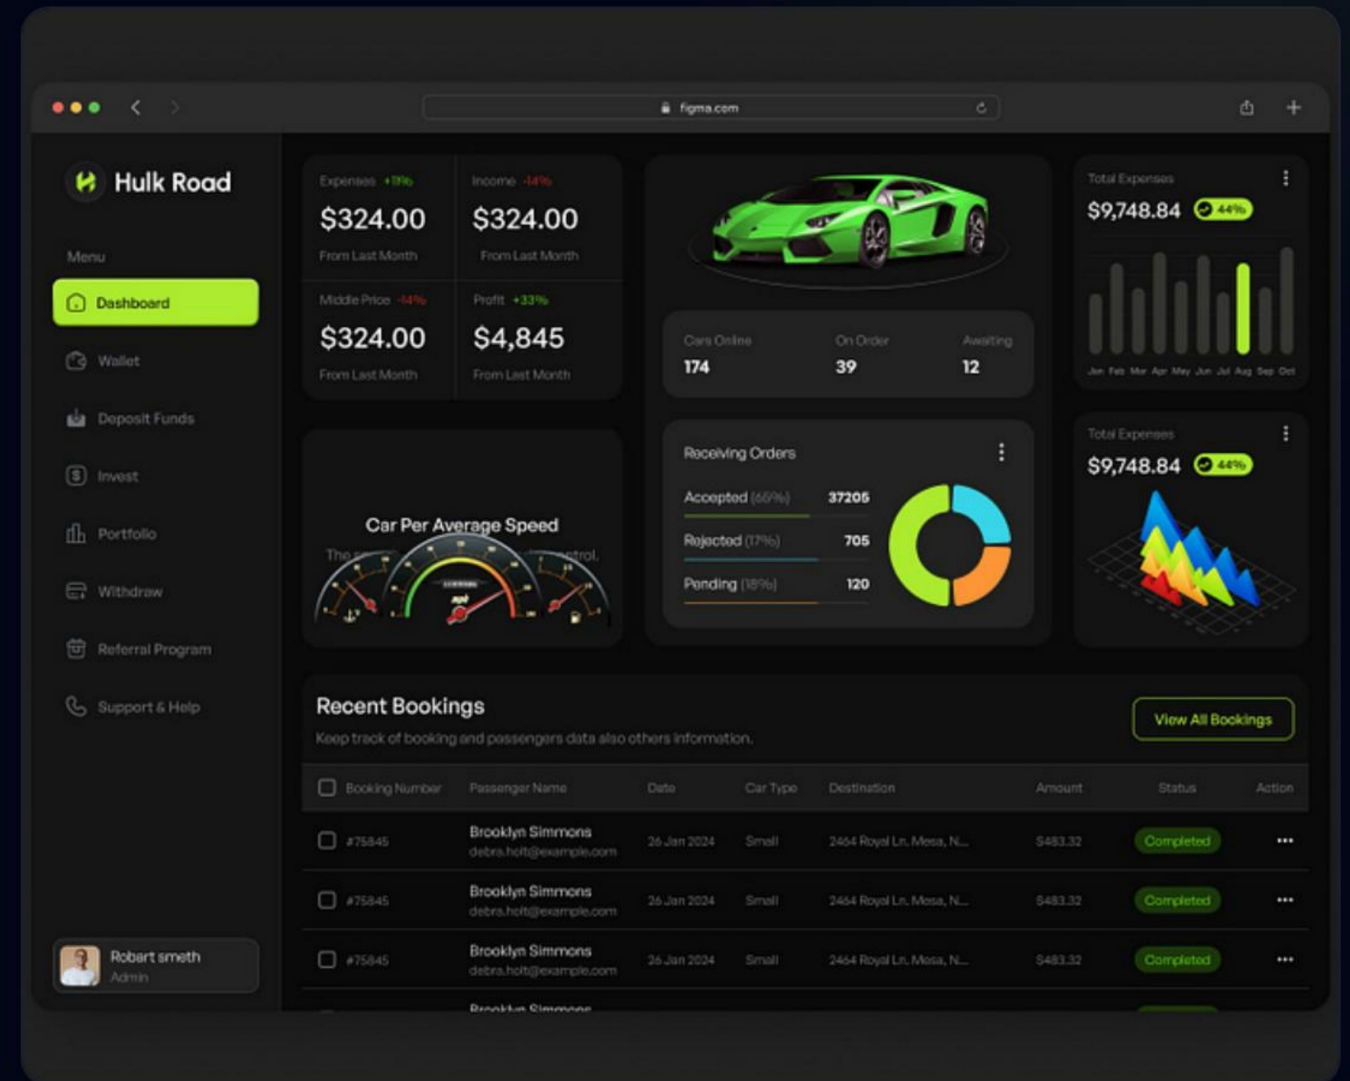

Revenue Recovery at Scale

Closing the gap between Finance and Legal with a custom system that automates demand letters and pemulihan piutang pipelines.

⚡ Instant Somasi (Legal Notice) Generation

📈 Real-time Compliance Monitoring

🛡️ Litigation-Ready Audit Trails

CORE EXPERTISE ECOSYSTEM

Legal Ops

Scaling contract review and approval chains through enterprise automation tools.

GRC Strategy

Digital frameworks for licensing, corporate secretarial, and regulatory reporting.

Legal-Tech R&D

Custom AI development for internal legal research and summarization bots.

PROFESSIONAL PEDIGREE

Legal Ops & Systems Architect

"Law builds structure. Code scales it."

Final-semester Law candidate with a Computer Science background and practical experience across corporate legal operations, recovery workflows, licensing administration, and digital systems.

He transforms static legal documents into structured business workflows that improve compliance visibility, audit readiness, and operational control.

OPERATIONAL EFFICIENCY GAINS

*Comparative analysis of traditional vs automated legal operation metrics.

CORPORATE RECOVERY

Robust Legal Defense

Designing infrastructures that protect company capital. Combining **Procedural Law** with **Business Intelligence** to ensure certain outcomes.

We build the digital "shield" that allows SMEs and Corporates to scale aggressively without fear of regulatory or credit risk.
